Why *Saad?*

- Self-motivated software engineer with expertise in software engineering, operations, and support. Skilled in monitoring operations, implementing projects effectively, providing technical support, and developing strategies to optimize efficiency.
- Detail-oriented professional experienced in supervising and upgrading processes/software. Proficient in developing and managing control operating systems to enhance performance, and capable of evaluating and executing tasks according to infrastructural requirements while ensuring policy compliance.
- Dynamic project manager with expertise in developing and executing project plans, creating technical specifications, modifying test systems, tracking performance, reviewing software documentation, and recommending improvements. Collaborative team player with strong communication, analytical, and problem-solving skills.

CORE STRENGTHS & ENABLING SKILLS

- Software Engineering
- Frontend Development
- React.js & JavaScript
- Component-Based Architecture
- Information System Technology
- State Management & Redux
- APIs & RESTful Services
- Version Control (Git)
- Cross-Browser Compatibility
- Responsive Design
- Problem Solving & Debugging
- Communication & Presentation Skills

TOOLS & TECHNOLOGIES

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Context API, Redux | Development Tools: Visual Studio Code, Git, Webpack, Vite, npm, Yarn | **Databases: Firebase, MongoDB | Version Control:** GitHub, GitLab | **Others:** Stream.io, Fastify, React Query, Postman, JIRA

PROFESSIONAL EXPERIENCE

Enigmatix (Pvt) Ltd, Bahawalpur, Pakistan

Frontend Developer Intern, Jaunuary 2024 – Present

Responsibilities/Accomplishments:

- **Developed and maintained frontend components** for various applications using React.js, HTML, CSS, and Tailwind CSS, focusing on responsive design and user experience.
- **Collaborated with backend developers** to integrate APIs and ensure seamless data flow between frontend and backend systems.
- **Performed UI and functional testing** to identify and resolve issues, ensuring high-quality and bug-free applications.
- **Engaged in debugging and troubleshooting**, providing timely solutions for frontend issues and optimizing application performance.
- **Developed internal tools**, such as an Employee Time Tracking Portal and Service Desk software, utilizing HTML, CSS, Bootstrap, and Django for backend development.

Notable Contributions:

- ✓ **Worked on the Chat Application project**, implementing real-time messaging features using React.js and Stream.io, and improving the application's user interface and functionality.
- ✓ **Enhanced the Budget Allocation Tool**, optimizing user interfaces and ensuring efficient data management through React.js.
- ✓ **Created and tested CRUD table applications**, focusing on data management and user interactions using React.js and mock APIs.
- ✓ **Created todo-list via Figma,** focus on building todos

PROFESSIONAL PROJECTS

- **Chat Application | Role: Frontend Developer**
  Technology: React.js, Context API, Stream.io, Tailwind CSS, Fastify
  OS: Windows
- **Fiver Dashboard Clone | Role: Frontend Developer**
  Technology: React.js, Tailwind
  OS: Windows
- **JavaScript Snake Game | Role: Developer**
  Technology: JavaScript, HTML, CSS
  Description: Classic snake game implemented using pure JavaScript

- **React.js CRUD Table with Mock API | Role: Frontend Developer**
  Technology: React.js, JavaScript
  Description: Built a CRUD table application using React.js and a mock API
- **TodoList Application | Role: Frontend Developer**
  Technology: JavaScript
  Description: Built a classic todo list application using pure Javascript

PROFESSIONAL QUALIFICATION

- **Islamia University, Bahawalpur, Pakistan** (2023 – 2027)
  BS – Computer Science
  Projects:
  TodoList Application: **Role:** Programmer, **Technology**: Flutter, Dart | **Tools**: Visual Studio (2015)

- **Superior College Hasilpur, Pakistan** (2019 – 2021)
  FSc– Pre-Medical
